## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 18-29, drawn to a method for identifying an intramer, classified in 435, subclass 6.
  - II. Claim 30, drawn to host cell containing one or more vectors having the intramer, classified in class 435, subclass 325.
  - III. Claims 31-32, drawn to a pharmaceutical composition and use classified in class 424, subclass 1.73.
  - IV. Claims 33-34, drawn to the use of a compound which modifies an intracellular target classified in class 435, subclass 6.
  - V. Claim 35, drawn to a diagnostic kit, classified in class 435, subclass 810.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and (II, III, IV & V) are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the method for identifying an intramer can also be used to identify metal ion binding sites in nucleic acids.

Inventions II and (III, IV and V) are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case Invention II is drawn to a host cell containing a vector which functions as a means of cloning candidate DNA sequences.

Art Unit: 1637

Invention III is drawn to a pharmaceutical composition that modifies the function of a specific target. Invention IV is related to a use for an unspecified intracellular target. Invention V is drawn to a diagnostic kit.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
